Branch-Denison Hotel. Tel. 1375.

New York Exchange Business Quiet and Prices Firm Until Near the Close.

Bears Had the Advantage in the Efflux of Currency to the West-Indianapolis Grain More Active but Weak in Tone.

THE BOND MARKET. Railway Issues Were Active and Heavy or

Sales of \$903,000. At New York, yesterday, money on call was firm, ranging from 5 to 10 per cent., the last loan being made at 8, closing offered at 8.

Prime mercantile paper, 8@8 per cent. Sterling exchange was steady, with actual business in bankers' bills at \$4.85@4.854 for sixty days and \$4.86% @4.87 for demand.

The New York stock market was quiet again yesterday and Irregular in its course. Considering the adverse influences operating against the list the undertone of speculation was comparatively firm, and in numeorous instances prices closed higher than Tuesday. The bears had in their favor the continued efflux of currency to the West, estimated at \$1,500,000 to \$1,750,000, and the numerous failures reported in banking and business circles. On the strength of all this, frequent attacks were made on the leading shares, but the market railied easily each time the pressure was lifted. London was a moderate buyer, and it was chiefly responsible for the strength shown by Louisville & Nashville. The general market held up well until the rate for money jumped to 10 per cent., when there was some decline. The grangers, Louisville & Nashville, Western Union, Northern Pacific preferred, New England, Lake Shore, Lackawanna and Distillers were relatively firm. There was a rally of 1/8 to 3/8 in the final sales, but the market left off rather weak.

A feature of the afternoon trading was a sudden slump in National Starch Manufacturing second preferred, which sold at 30, and later at 25, ending with a rally to 284. The last sale reported before to-day was at 83. Only 350 shares changed hands. On odd lots the first preferred sold at 60, a drop of 20 points. The second preferred closed at 29 bid and 60 asked. The cause for the break was the announcement that the directors had met at Covington, Ky. on the 7th of this month and had decided to pass the dividend on the second pre-

Railway bonds were active and heavy. The sales were \$903,000. Chicago & Eastern Illinois fives rose 2, to 92; Chesapeake & Ohio consol fours 2, to 81. Government bonds were steady and State bonds dull. Closing quotations were:

Bar Silver-At New York, 83 % o per ounce;

LOCAL GRAIN AND PRODUCE. Trade Taking on a Summer Steadiness, with

As the heated term, which will cover several weeks, sets in trade takes on its summer volume. The business of June thus far, however, has been in excess of last year for the corresponding period. Prices on staple articles are apt to rule steadier during the summer months. Provisions are selling still at prices which cannot long and dry goods are firm in tone, and on staple groceries advances are more prob-

able than declines. The local market, with fine weather and large receipts of corn and oats, is quite active. Indianapolis shippers and dealers are taking all grain offered at the prices quoted from day to day, but there is a weak tone to the market, from which there is no rallying. Track bids yesterday ranged as fol-

REAM'S BOLD PREDICTION

A Chicago Dealer Says Wheat Will Go Up 25 Cents Before It Drops 3 Cents.

Reported 3,500,000-Bushel Decrease in Available Supply Stocks, with a Better Tone to Cables, Led to an Advance Yesterday.

TRADING AT CHICAGO.

Corn Was 3se Higher and Provisions Declined on Liberal Receipts.

CHICAGO. June 14 .- Available wheat stocks were reported this afternoon as showing a decrease of 3,500,000 bushels. Prices in consequence closed firm at top figures. The better tone to cables, the more settled financial conditions, the prospect that big stocks of cash wheat will be cared for by the clique and the banks, helped to prouce the advance. The fact that export and cash sales were light was the chief obstacle to a bull market. Corn closed 380 higher. Considering the liberal receipts, hogs showed considerable steadiness, and the declines were limited to 50 in pork, .0740 in lard and .124c in ribs.

At the start the feeling in wheat was firm on the cables. Ream covered a considerable line of shorts, and there was not much for sale. But the crop bulletins were nearly all favorable, and some additional bank troubles being reported in the West, the feeling gradually turned weak. Armour became a good seller, and reports were received saying that harvesting had already begun in Kansas. There was another development of strength during the closing hour on the higher continental cables, and large decrease in the available supply reported by Bradstreet's. There were reports of hot winds in the Northwest having done some damage to the crop, and it was also said that the weedy condition of the fields had affected the growth of spring wheat. same as yesterday's closing, advanced 100 %c. eased off again 12@ %c. recovered fully. and the closing was about % c higher than yesterday. Ream was quoted as saying that he thought wheat would go up 25c before going down 3c.

Another active day was witnessed in the corn pit. The feeling was again firm, and still higher prices scored, but the full advance was not maintained. The price was helped largely by the stronger cables, continued liberal out-inspection and the very moderate receipts, which, as on Yesterday, had a tendency to make shorts a little anxious. The opening was firm at about 40 advance, with a very good demand, especially for September. Traders are somewhat stirred up over Wright's position in corn. Many think he has a deal on.

There was a fair trade in oats, and an un-settled feeling. Prices for July advanced %c early, with good buying, but later reacted % @ 40, then advanced % @ 40, and closed steady, with a net gain of % @1c. September advanced 40%c, and closed with a net gain of lac. Receipts were

With the run of live stock at the yards considerably in excess of the estimates and lower prices for them, the market for provisions opened weak. There was, how-ever, nothing doing beyond a few trades in lard and a little selling of ribs by the packers for September delivery, the market rallying on the strength in wheat and corn. An active demand existed for shipment. Freights were steady with a fair demand for vessel room at 24c for wheat and 2c for corn to Buffalo. Estimated receipts for to-

morrow are: Wheat, 38 cars; corn, 350 cars; oats, 180 cars; hogs, 27,000. The leading futures ranged as follows: Options. Wheat-June

at \$3@6.50. How to Grow Pumpkins. Writer in Grange Homes. Pumpkins are an uncertain crop. Some farmers say that all the pumpkins you get

are so much corn. I do not believe a word

600; shipments, 8,000. Lambs barely steady

I had failed in my pumpkin crop several years and I was mad about it. One day, when I was riding through Acton, Mass., I saw a fine field of corn all full of pumpkins, and a man walking around in it looking as if he was the happy owner. So I left my

old horse and went into the field. "Good morning, sir. Do you own this corn?" "I suppose I do." "You must be an almighty splendid hallelnjah kind of a man to have such a field of pumpkins as these and nobody else on the road has any. How do you manage it?" He laughed. "Of course you plant your pumpkins

"Yes, sir." "And of course you don't get any pump-

when you do your corn?"

"Now, don't you do it any more. It is too early. Then, again, the pumpkin bugs eat them. Not that the pumpkin bugs like them, but there is nothing else for the bugs to eat so early; the bugs eat what the cold does not kill. But at your first hoeing you stick a pumpkin seed, point downward, in one side of every sixth hill of corn. Then the seed will not have to shift ends of itself and roll over in the ground, but Texans, \$2.75@8.75; native cows, \$3.25@3.75; will come up and grow like a weed and make you laugh."

The next year I had four acres of corn in one piece and many cartfuls of as perfect pumpkins as I ever saw grown. Fine-grained pumpkins make the best of pies, and, in moderation, are an addition to the feed of cattle. Too much pumpkin test, at 3%c, and 4 cargoes centrifugals, 96 | 10@15c lower. Common natives, \$1@4.85; | 1s not good, as the seeds are too strong a

diuretic. They had better be cut in a root cutter and sprinkled with meal or mid-
